

WHY JOIN US?

Because we believe everyone needs to come together in caring for the Earth. Extra volunteers are needed, and all support is vital for our efforts.

WHAT IS A CONSERVANCY?

“A conservancy is the voluntary co-operative environmental management of an area, by its community and user groups, and in respect of which registration has been granted by the relevant provincial nature conservation authorities.”

OUR OBJECTIVES

- Generate interest and active participation by landowners/lessees of leased land in the conservation and protection of indigenous fauna (animals especially the threatened Sungazer Lizard) and flora (indigenous plant life) as well as the Pine forest, Willow and Poplar trees and the protection of the environment in the area;
- Monitor proposed physical development in the area and, if necessary, the objection of the Conservancy thereto;
- Co-operate with authorities in respect of the management of the conservancy;
- Collect funds and use such funds for the promotion of the conservancy's activities.

For more information on the Paul Roux Conservancy, feel free to contact us on:
